

**Table 19A. Profile of Criminal Justice or Juvenile Justice Involvement:**

1. This is a developmental measure. To assist in the development process, we are asking states to report information on the arrest histories of mental health consumers with their December 2006 MHBG submission.
2. The SAMHSA National Outcome Measure for Criminal Justice measures the change in Arrests over time. The DIG Outcomes Workgroup pilot tested 3 consumer self-report items that can be used to provide this information. If your state has used the 3 Consumer Self-Report items on Arrest, you may report them here.
3. If your SMHA has data on Arrest records from alternative sources, you may also report that here. If you only have data for arrests for consumers in this year, please report that in the T2 columns. If you can calculate the change in Arrests from T1 to T2, please use all those columns.
4. Please complete the check boxes at the bottom of the table to help explain the data sources that you used to complete this table.
5. Please tell us anything else that would help us to understand your indicator (eg., list survey or MIS questions; describe linking methodology and data sources; specify time period for criminal justice involvement; explain whether treatment data are collected)
